

TRANSPORTATION

What does the federal government's plan to invest \$14.9-billion over eight years in public transit say about its commitment to public transit improvements? Is the funding being distributed optimally between rural transit solutions, the zero-emission transit fund, and the funding for bike lanes, trails and pedestrian bridges?

The National Supply Chain task force released its list on Oct. 6 of 21 recommendations for actions to build resiliency in Canada's supply chain. What will be the most important considerations as the Liberal government develops its National Supply Chain strategy?

What is the status of Canada's transition to a green transportation sector? Is the construction of charging infrastructure and zero-emissions vehicles going to be able to accommodate the demand?

How are labour shortages and supply chain issues impacting the transportation sector? How can the federal government help?

What are the challenges facing Canada's aviation sector this fall? How do the delays and labour issues facing the aviation sector currently compare to the summer?
